

CAR RADIO CROSSROADS

Join Jason Chaffee and his band on a nostalgic journey from musical influence to identity

For Gen X, there's still nothing like the feeling of a familiar song playing on the radio. The car stereo was where we first discovered music that spoke directly to us, songs that stayed long after the engine turned off.

Minneapolis musician **Jason Chaffee** has a soundtrack that traveled with him from Chicago to the north woods of WI, then to Seattle and back to the Midwest. It inspired him to write songs, and now **Car Radio Crossroads** is built around Chaffee's original music in combination with the songwriting legacies of Bob Seger, Peter Gabriel, and Bruce Springsteen - distinct voices that influenced Chaffee's own unique sound.

Blending carefully selected classics with an equal number of originals, the show traces a seamless arc from musical influence to identity. Familiar melodies give way to new favorites derived from the same emotional DNA, including selections from Chaffee's forthcoming album, **The Weight of the Sky**. You'll love how the sounds that once filled the car radio continue to evolve.

Chaffee's powerful vocal presence pairs with a full band of pros to deliver dynamic and energized performance. Car Radio Crossroads scales from intimate stages to festival settings. The goal is to connect with audiences who value musicianship, storytelling, and the enduring power of a great song.
