

# Car Radio Crossroads

**A live musical journey from Jason Chaffee**  
*Songs that shaped a generation. Songs that shaped an artist.*

For Gen X, there's still nothing like the surprise of a familiar song coming on the radio. The car stereo was where we first discovered music that spoke directly to us, songs that stayed long after the engine shut off.

For Minneapolis musician Jason Chaffee; a soundtrack traveled with him from Chicago to Seattle and back to the Midwest. **Car Radio Crossroads** centers on the songwriting legacies of Bob Seger, Peter Gabriel, and Bryan Adams - distinct voices that influenced Chaffee's own unique sound.

Blending carefully selected classics with an equal number of original songs, the show traces a seamless arc from influence to identity. Familiar melodies give way to new ones born from the same emotional DNA, including selections from Chaffee's forthcoming album, "**The Weight of the Sky**," revealing how the music that once filled the car radio continues to evolve.

With dynamic arrangements and a powerful vocal presence, **Car Radio Crossroads** scales from intimate stages to festival settings, delivering a cohesive, full-band performance built for audiences who value musicianship, storytelling, and the enduring power of a great song.
